PROJECTS

E-Commerce Sync Platform (Laravel + WooCommerce)

- Built RESTful Laravel backend integration to sync orders, prices and inventory between WooCommerce and client's internal inventory system.
- Also built a **Multi-tenancy** version of this project

Estate Agency Platform (Laravel + Wordpress)

- Built RESTful Laravel backend integration to sync Real Estate Properties from client internal CMS to Frontend (Wordpress).
- Also built a **Multi-tenancy** version of this project

Drupal Based System

- Developed custom modules, content types, created Paragraph-based forms, and exposed structured data via JSON:API.

Note: Unable to share company source code due to NDA, but live project walkthroughs can be shown upon request.
