## TECHNICAL SKILLS

**Backend**
PHP • Laravel • RESTful APIs

**CMS & E-commerce**
Drupal • WordPress • WooCommerce

**Database**
MySQL, PostgreSQL

**Web**
JavaScript • HTML • CSS

**Tools**
Git • Composer • Postman • Insomnia • VS Code • Bitbucket. • Github • Jira

**Environment**
cPanel • SSH

**AI-assisted development**
Claude Code

AI-assisted coding, debugging, code exploration, and implementation workflows

## LANGUAGES

English – Strong written communication; spoken proficiency developing

Filipino – Native

## TECHNICAL KNOWLEDGE

**Academic familiarity**

Java • C++ • C# • Python, PHP

Object-oriented programming fundamentals

## CURRENTLY EXPLORING

Vue.js • React • Angular

## PROFESSIONAL FOCUS

Laravel backend development

REST API integrations

Multi-tenant applications

Headless CMS architecture

Growing frontend development skills

AI-assisted software development

# ARCHELL ENAYA (Arch)

BACKEND WEB DEVELOPER

## PROFESSIONAL SUMMARY

Backend Web Developer with over 8 years of professional experience specializing in PHP and Laravel application development, REST API integrations, and backend system architecture. Experienced in building and maintaining scalable web applications, integrating third-party services, and developing custom solutions using Drupal and WordPress. Contributed to projects for both private-sector clients and government-related organizations in Malta, with hands-on experience in multi-tenant applications, e-commerce integrations, and headless CMS architecture. Adept at collaborating with international teams and delivering maintainable solutions aligned with business requirements.

## PROFESSIONAL EXPERIENCE

### Backend Web Developer

**Born Digital Ltd. – Malta, Europe** / *2018–Present*

- Develop and maintain Laravel backend systems for internal and client-facing platforms.
- Design and implement REST API integrations between Laravel applications, WordPress, and WooCommerce systems.
- Build data synchronization functionality for business systems, including orders, product pricing, inventory, and property information.
- Develop and maintain custom Drupal modules, structured content, and Paragraph-based forms.
- Contribute to headless CMS implementations by exposing structured Drupal content through JSON:API for frontend consumption.
- Collaborate with project managers and developers across Malta and the Philippines to deliver and maintain client solutions.
- Write maintainable code and support ongoing improvements to CMS-based websites and custom applications.

## SELECTED PROJECTS

### E-Commerce Synchronization Platform / *Laravel + WooCommerce*

- Built a Laravel REST API integration to synchronize orders, product prices, and inventory between WooCommerce and a client's internal inventory system.
- Developed a multi-tenant version of the integration platform.

### Estate Agency Platform / *Laravel + WordPress*

- Built a Laravel REST API integration to synchronize real estate property data from a client's internal CMS to a WordPress frontend.
- Developed a multi-tenant version of the platform.

### Drupal-Based Headless CMS / *Drupal + Next.js*

- Developed custom Drupal modules and content types, created Paragraph-based forms, and exposed structured content through JSON:API.
- Worked with a headless CMS architecture in which Drupal manages content and a Next.js frontend handles presentation.

## EDUCATION

### Bachelor of Science in Computer Science

Major in Software Engineering | Mindanao State University – Marawi City, Philippines / *Graduated 2018*

- Academic foundation in Java and C++, object-oriented programming, data structures, web development, software engineering and database management.
- Additional coursework included Expert Systems and Data Mining.
